

# SAFETY DATA SHEET

## 1. Identification

Product identifier	ACETONITRILE, HPLC		
Other means of identification			
Product code	2482		
CAS number	75-05-8		
Synonyms	ETHANE NITRILE * METHY	L CYANIDE * CYANOMETHANE	
Recommended use		professional, scientific and technical activities: other professional, scientific and technical activities, solvent technical function of substance	
<b>Recommended restrictions</b>	None known.		
Manufacturer/Importer/Supp	lier/Distributor informatio	n	
Manufacturer			
Company name Address	GFS Chemicals, Inc. P.O. Box 245 Powell, OH 43065 United States		
Telephone	Phone Toll Free Fax	740-881-5501 800-858-9682 740-881-5989	
Website	www.gfschemicals.com		
E-mail	service@gfschemicals.com		
Emergency phone number	Emergency Assistance	Chemtrec 800-424-9300	
2. Hazard(s) identification	on		
Physical hazards	Flammable liquids	Category 2	
Llealth havenda	A outo tovicity and	Catagory 2	

Physical hazards	Flammable liquids	Category 2
Health hazards	Acute toxicity, oral	Category 3
	Acute toxicity, dermal	Category 3
	Acute toxicity, inhalation	Category 3
	Serious eye damage/eye irritation	Category 2A
Environmental hazards	Not classified.	
OSHA defined hazards	Not classified.	

Label elements

Response

Highly flammable liquid and vapor. Toxic if swallowed. Toxic in contact with skin. Causes serious eve irritation. Toxic if inhaled.

Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Keep container tightly

electrical/ventilating/lighting equipment. Use only non-sparking tools. Take precautionary

closed. Ground/bond container and receiving equipment. Use explosion-proof

Precautionary statement Prevention

> measures against static discharge. Avoid breathing vapors. Wash thoroughly after handling. Do not eat, drink or smoke when using this product. Use only outdoors or in a well-ventilated area. Wear protective gloves/protective clothing. Wear protective gloves/eye protection/face protection. IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell. Rinse mouth. If on prince the protective of the protective gloves of the protection of the protective gloves.

Danger

IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell. Rinse mouth. If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. If inhaled: Remove person to fresh air and keep comfortable for breathing. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Call a POISON CENTER or doctor/physician. If eye irritation persists: Get medical advice/attention. Take off immediately all contaminated clothing and wash it before reuse. In case of fire: Use appropriate media to extinguish.

Storage	Keep cool. Store in a well-ventilated place. Keep container tightly closed. Store locked up. Store contents under inert gas.
Disposal	Dispose of contents/container to an appropriate treatment and disposal facility in accordance with applicable laws and regulations, and product characteristics at time of disposal.
Hazard(s) not otherwise classified (HNOC) Supplemental information	Static accumulating flammable liquid can become electrostatically charged even in bonded and grounded equipment. Sparks may ignite liquid and vapor. May cause flash fire or explosion.
Supplemental information	None.

## **3.** Composition/information on ingredients

Substances

Chemical name	Common name and synonyms	CAS number	%	
ACETONITRILE	ETHANE NITRILE METHYL CYANIDE CYANOMETHANE	75-05-8	100	

\*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

5	, , , , , , , , , , , , , , , , , , , ,
4. First-aid measures	
Inhalation	Remove victim to fresh air and keep at rest in a position comfortable for breathing. Oxygen or artificial respiration if needed. Do not use mouth-to-mouth method if victim inhaled the substance. Induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. Call a POISON CENTER or doctor/physician.
Skin contact	Take off immediately all contaminated clothing. Rinse skin with water/shower. Get medical advice/attention if you feel unwell. Get medical attention if irritation develops and persists. Wash contaminated clothing before reuse.
Eye contact	Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention if irritation develops and persists.
Ingestion	Call a physician or poison control center immediately. Rinse mouth. Do not induce vomiting without advice from poison control center. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs. Do not use mouth-to-mouth method if victim ingested the substance. Induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device.
Most important symptoms/effects, acute and delayed	Convulsions. Nausea, vomiting. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Thermal burns: Flush with water immediately. While flushing, remove clothes which do not adhere to affected area. Call an ambulance. Continue flushing during transport to hospital. In case of shortness of breath, give oxygen. Keep victim warm. Keep victim under observation. Symptoms may be delayed.
General information	Take off immediately all contaminated clothing. Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Show this safety data sheet to the doctor in attendance. Wash contaminated clothing before reuse.
5. Fire-fighting measures	5
Suitable extinguishing media	Water fog. Alcohol resistant foam. Carbon dioxide (CO2). Dry chemical powder, carbon dioxide, sand or earth may be used for small fires only.
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	Vapors may form explosive mixtures with air. Vapors may travel considerable distance to a source of ignition and flash back. This product is a poor conductor of electricity and can become electrostatically charged. If sufficient charge is accumulated, ignition of flammable mixtures can occur. To reduce potential for static discharge, use proper bonding and grounding procedures. This liquid may accumulate static electricity when filling properly grounded containers. Static electricity accumulation may be significantly increased by the presence of small quantities of water or other contaminants. Material will float and may ignite on surface of water. During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire. Wear SCBA.
Fire fighting equipment/instructions	In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.

Highly flammable liquid and vapor.

**General fire hazards** 

## Accidental release measures

6. Accidental release mea	asures
Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Wear appropriate protective equipment and clothing during clean-up. Avoid inhalation of vapors and spray mists. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Use appropriate containment to avoid environmental contamination. Transfer by mechanical means such as vacuum truck to a salvage tank or other suitable container for recovery or safe disposal. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Stop leak if you can do so without risk. ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). Prevent entry into waterways, sewers, basements or confined areas. Keep combustibles (wood, paper, oil, etc.) away from spilled material. Take precautionary measures against static discharge. Use only non-sparking tools. This product is miscible in water. Should not be released into the environment. Clean up in accordance with all applicable regulations.
	Large Spills: Dike the spilled material, where this is possible. Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Following product recovery, flush area with water.
	Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.
	Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground. Use appropriate containment to avoid environmental contamination.
7. Handling and storage	
Precautions for safe handling	Do not handle, store or open near an open flame, sources of heat or sources of ignition. Protect material from direct sunlight. Explosion-proof general and local exhaust ventilation. Minimize fire risks from flammable and combustible materials (including combustible dust and static accumulating liquids) or dangerous reactions with incompatible materials. Handling operations that can promote accumulation of static charges include but are not limited to: mixing, filtering, pumping at high flow rates, splash filling, creating mists or sprays, tank and container filling, tank cleaning, sampling, gauging, switch loading, vacuum truck operations. Take precautionary measures against static discharges. All equipment used when handling the product must be grounded. Use non-sparking tools and explosion-proof equipment. Do not taste or swallow. Avoid inhalation of vapors and spray mists. Avoid contact with eyes, skin, and clothing. Avoid prolonged exposure. When using, do not eat, drink or smoke. Use only outdoors or in a well-ventilated area. Wear appropriate personal protective equipment. Wash hands thoroughly after handling. Wash contaminated clothing before reuse. Observe good industrial hygiene practices.
	For additional information on equipment bonding and grounding, refer to the Canadian Electrical Code in Canada, (CSA C22.1), or the American Petroleum Institute (API) Recommended Practice 2003, "Protection Against Ignitions Arising out of Static, Lightning, and Stray Currents" or National Fire Protection Association (NFPA) 77, "Recommended Practice on Static Electricity" or National Fire Protection Association (NFPA) 70, "National Electrical Code".
Conditions for safe storage, including any incompatibilities	Material should be stored under an inert atmosphere. Store locked up. Keep away from heat, sparks and open flame. Prevent electrostatic charge build-up by using common bonding and grounding techniques. Eliminate sources of ignition. Avoid spark promoters. Ground/bond container and equipment. These alone may be insufficient to remove static electricity. Store in a cool, dry place out of direct sunlight. Store in original tightly closed container. Store in a well-ventilated place. Keep in an area equipped with sprinklers. Store away from incompatible materials (see Section 10 of the SDS).

#### 8. Exposure controls/personal protection

#### **Occupational exposure limits**

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

r Air Contaminants (29 CFR 19: Type	L0.1000) Value	
PEL	70 mg/m3	
	40 ppm	
	Туре	PEL 70 mg/m3

US. ACGIH Threshold Lim Material	nit Values Type	Value
ACETONITRILE (CAS 75-05-8)	TWA	20 ppm
US. NIOSH: Pocket Guide	e to Chemical Hazards	
Material	Туре	Value
ACETONITRILE (CAS 75-05-8)	TWA	34 mg/m3
		20 ppm
Biological limit values	No biological exposure limits n	oted for the ingredient(s).
Exposure guidelines		
US ACGIH Threshold Lim	it Values: Skin designation	
ACETONITRILE (CAS 75	,	Can be absorbed through the skin.
	gulations, Title 8, Section 515	
ACETONITRILE (CAS 75	5-05-8) <b>s Substances List (Minn. Rules</b>	Can be absorbed through the skin.
ACETONITRILE (CAS 75	_	Skin designation applies.
Appropriate engineering		
controls	Explosion-proof general and local exhaust ventilation. Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station. Eye wash fountain and emergency showers are recommended.	
Individual protection measur	res, such as personal protectiv	e equipment
Eye/face protection	Wear safety glasses with side	shields (or goggles).
Skin protection		
Hand protection	Wear appropriate chemical res	istant gloves.
Other	Wear appropriate chemical res	istant clothing. Use of an impervious apron is recommended.
Respiratory protection	If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn. Chemical respirator with organic vapor cartridge.	
Thermal hazards	Wear appropriate thermal prot	ective clothing, when necessary.
General hygiene considerations	measures, such as washing aft	ep away from food and drink. Always observe good personal hygiene ter handling the material and before eating, drinking, and/or smoking. and protective equipment to remove contaminants.
9. Physical and chemica	al properties	
Appoaranco	 Clear	

Appearance	Clear.
Physical state	Liquid.
Form	Liquid.
Color	Colorless.
Odor	Aromatic.
Odor threshold	Not available.
рН	Not available.
Melting point/freezing point	-49 °F (-45 °C)
Initial boiling point and boiling range	178.88 °F (81.6 °C) 101.325 kPa
Flash point	55.0 °F (12.8 °C) Closed Cup 42.0 °F (5.6 °C) Open Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	
Flammability limit - lower (%)	3 %
Flammability limit - upper (%)	16 %

Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	11.84 kPa at 25 °C
Vapor density	1.42
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Miscible
Partition coefficient (n-octanol/water)	-0.34
Auto-ignition temperature	975.2 °F (524 °C)
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Density	0.79 g/cm3 estimated at 15 °C
Dynamic viscosity	0.35 mPa.s (68 °F (20 °C))
<b>Explosive properties</b>	Not explosive.
Flammability class	Flammable IB estimated
Flash point class	Flammable IB
Kinematic viscosity	0.4446 mm <sup>2</sup> /s estimated
Molecular formula	C2-H3-N
Molecular weight	41.05 g/mol
<b>Oxidizing properties</b>	Not oxidizing.
Percent volatile	100 %
Specific gravity	0.79 at 15 °C
Surface tension	29.04 mN/m (68 °F (20 °C))
VOC	100 %
	-

## 10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Stable at normal conditions.
Possibility of hazardous reactions	Hazardous polymerization does not occur.
Conditions to avoid	Avoid heat, sparks, open flames and other ignition sources. Avoid temperatures exceeding the flash point. Contact with incompatible materials.
Incompatible materials	Strong acids. Strong oxidizing agents.
Hazardous decomposition products	Carbon oxides.

### **11.** Toxicological information

#### Information on likely routes of exposure

Toxic if inhaled.
Toxic in contact with skin.
Causes serious eye irritation.
Toxic if swallowed.
Convulsions. Nausea, vomiting. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

#### Information on toxicological effects

Acute toxicity	Toxic if inhaled. Toxic in contact with skin. Toxic if swallowed.
