

SAFETY DATA SHEET

1. Identification			
Product identifier	PROPIONIC ACID, REAGE	NT (ACS)	
Other means of identification			
Product code	2411		
CAS number	79-09-4		
Synonyms	PROPANOIC ACID		
Recommended use	professional, scientific and tec	chnical activities:	other professional, scientific and technical activities
Recommended restrictions	None known.		
Manufacturer/Importer/Supp	lier/Distributor information		
Manufacturer			
Company name Address	GFS Chemicals, Inc. P.O. Box 245 Powell, OH 43065 United States		
Telephone		740-881-5501	
		800-858-9682 740-881-5989	
Website E-mail	www.gfschemicals.com service@gfschemicals.com	7-10-001-0909	
Emergency phone number	-	Chemtrec 800-42	24-9300
2. Hazard(s) identification	on		
Physical hazards	Flammable liquids		Category 3
Health hazards	Acute toxicity, oral		Category 4
	Acute toxicity, dermal		Category 3
	Skin corrosion/irritation		Category 1
	Serious eye damage/eye irrita	ation	Category 1
	Specific target organ toxicity,		
Environmental hazards	Not classified.	5 1	5, 1, ,
OSHA defined hazards	Not classified.		
Label elements			
Signal word	Danger		
Hazard statement			wed. Toxic in contact with skin. Causes severe skin mage. May cause respiratory irritation.
Precautionary statement			
Prevention	closed. Ground/bond containe electrical/ventilating/lighting e measures against static discha	er and receiving e equipment. Use o arge. Do not brea	surfaces No smoking. Keep container tightly equipment. Use explosion-proof only non-sparking tools. Take precautionary athe mist or vapor. Wash thoroughly after handling. oduct. Use only outdoors or in a well-ventilated area.

Wear protective gloves/protective clothing/eye protection/face protection. Response If swallowed: Rinse mouth. Do NOT induce vomiting. IF ON SKIN: Wash with plenty of soap and water. If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. If inhaled: Remove person to fresh air and keep comfortable for breathing. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor/physician. Take off immediately all contaminated clothing and wash it before reuse. In case of fire: Use appropriate media to extinguish.

Storage	Keep cool. Store in a well-ventilated place. Keep container tightly closed. Store locked up. Store in corrosive resistant container with a resistant inner liner.
Disposal	Dispose of contents/container to an appropriate treatment and disposal facility in accordance with applicable laws and regulations, and product characteristics at time of disposal.
Hazard(s) not otherwise classified (HNOC)	None known.
Supplemental information	None.

3. Composition/information on ingredients

Substances

Chemical name	Common name and synonyms	CAS number	%	
PROPIONIC ACID	PROPANOIC ACID	79-09-4	100	

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures	
Inhalation	Remove victim to fresh air and keep at rest in a position comfortable for breathing. Call a POISON CENTER or doctor/physician if you feel unwell.
Skin contact	Take off immediately all contaminated clothing. Rinse skin with water/shower. Call a physician or poison control center immediately. Chemical burns must be treated by a physician. Wash contaminated clothing before reuse.
Eye contact	Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Call a physician or poison control center immediately.
Ingestion	Call a physician or poison control center immediately. Rinse mouth. Do not induce vomiting. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs.
Most important symptoms/effects, acute and delayed	Nausea, vomiting. Abdominal pain. Burning pain and severe corrosive skin damage. Causes serious eye damage. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. May cause respiratory irritation.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Thermal burns: Flush with water immediately. While flushing, remove clothes which do not adhere to affected area. Call an ambulance. Continue flushing during transport to hospital. Chemical burns: Flush with water immediately. While flushing, remove clothes which do not adhere to affected area. Call an ambulance. Continue flushing during transport to hospital. Keep victim warm. Keep victim under observation. Symptoms may be delayed.
General information	Take off immediately all contaminated clothing. If you feel unwell, seek medical advice (show the label where possible). Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Show this safety data sheet to the doctor in attendance. Wash contaminated clothing before reuse.
5. Fire-fighting measures	5

Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	Vapors may form explosive mixtures with air. Vapors may travel considerable distance to a source of ignition and flash back. During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions	In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	Flammable liquid and vapor.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Wear appropriate protective equipment and clothing during clean-up. Do not breathe mist or vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up	Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Keep combustibles (wood, paper, oil, etc.) away from spilled material. Take precautionary measures against static discharge. Use only non-sparking tools. This product is miscible in water.
	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Following product recovery, flush area with water.
	Small Spills: Absorb with earth, sand or other non-combustible material and transfer to containers for later disposal. Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.
Environmental precautions	Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS. Avoid discharge into drains, water courses or onto the ground.
7. Handling and storage	
Precautions for safe handling	Do not handle, store or open near an open flame, sources of heat or sources of ignition. Protect material from direct sunlight. Explosion-proof general and local exhaust ventilation. Take precautionary measures against static discharges. All equipment used when handling the product must be grounded. Use non-sparking tools and explosion-proof equipment. Do not breathe mist or vapor. Do not get in eyes, on skin, or on clothing. Do not taste or swallow. Avoid prolonged exposure. When using, do not eat, drink or smoke. Wear appropriate personal protective equipment. Wash hands thoroughly after handling. Wash contaminated clothing before reuse. Observe good industrial hygiene practices.
Conditions for safe storage, including any incompatibilities	Store locked up. Keep away from heat, sparks and open flame. Prevent electrostatic charge build-up by using common bonding and grounding techniques. Store in a cool, dry place out of direct sunlight. Store in original tightly closed container. Store in a well-ventilated place. Keep in an area equipped with sprinklers. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

Material	nit Values Type	Value
PROPIONIC ACID (CAS 79-09-4)	TWA	10 ppm
US. NIOSH: Pocket Guide		
Material	Туре	Value
PROPIONIC ACID (CAS 79-09-4)	STEL	45 mg/m3
		15 ppm
	TWA	30 mg/m3
		10 ppm
ological limit values	No biological exposure limits noted	for the ingredient(s).
ntrols	changes per hour) should be used. Ventilation rates should be matched to conditions. If applicabl use process enclosures, local exhaust ventilation, or other engineering controls to maintain airbor levels below recommended exposure limits. If exposure limits have not been established, maintai airborne levels to an acceptable level. Eye wash facilities and emergency shower must be availab when handling this product.	
Eye/face protection measured by Eye/face protection	res, such as personal protective equipment wear safety glasses with side shield	-
Skin protection Hand protection	Wear appropriate chemical resistant gloves.	
Other	Wear appropriate chemical resistant clothing. Use of an impervious apron is recommended.	
Respiratory protection	If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn. Chemical respirator with organic vapor cartridge.	
	cartridge.	

General hygiene	When using do not smoke. Keep away from food and drink. Always observe good personal hygiene
considerations	measures, such as washing after handling the material and before eating, drinking, and/or smoking.
	Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

•	
Appearance	
Physical state	Liquid.
Form	Liquid.
Color	Colorless.
Odor	unpleasant
Odor threshold	Not available.
рН	Not available.
Melting point/freezing point	-6.7 °F (-21.5 °C)
Initial boiling point and boiling range	285.98 °F (141.1 °C)
Flash point	126.0 °F (52.2 °C) Closed Cup
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or ex	xplosive limits
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	0.47 kPa at 25 °C
Vapor density	2.56
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Miscible
Partition coefficient (n-octanol/water)	0.33
Auto-ignition temperature	870 °F (465.56 °C)
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Density	0.998
Explosive properties	Not explosive.
Flammability class	Combustible II estimated
Flash point class	Combustible II
Molecular formula	C3H6O2
Molecular weight	74.08 g/mol
Oxidizing properties	Not oxidizing.
Percent volatile	100 %
Surface tension	27.21 mN/m (59 °F (15 °C))
VOC	100 %
10. Stability and reactivit	
	. V

10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Avoid heat, sparks, open flames and other ignition sources. Avoid temperatures exceeding the flash point. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.

11. Toxicological information

Information on likely routes of exposure

Inhalation	May cause irritation to the respiratory system. Prolonged inhalation may be harmful	
Skin contact	Toxic in contact with skin. Causes severe skin burns.	
Eye contact	Causes serious eye damage.	
Ingestion	Causes digestive tract burns. Harmful if swallowed.	
Symptoms related to the physical, chemical and toxicological characteristics	Nausea, vomiting. Abdominal pain. Burning pain and severe corrosive skin damage. Causes serious eye damage. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. May cause respiratory irritation	

Information on toxicological effects

Acute toxicity	In high concentrations, vapors are anesthetic and may cause headache, fatigue, dizziness and
	central nervous system effects. Toxic in contact with skin. Harmful if swallowed.

Product	Species	Test Results
PROPIONIC ACID (CAS 79-09-4)		
Acute		
Dermal

Reproductive toxicity	This product is not expected to cause reproductive or developmental effects.	
• •		
Specific target organ toxicity - single exposure	May cause respiratory irritation.	
Specific target organ toxicity - repeated exposure	Not classified.	
Aspiration hazard	Not an aspiration hazard.	
Chronic effects	Prolonged inhalation may be harmful.	
12. Ecological information		
Ecotoxicity	The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.	
Persistence and degradability		
Bioaccumulative potential		
Partition coefficient n-octanol / water (log Kow) 0.33		
Mobility in soil	No data available.	
Other adverse effects	The product contains volatile organic compounds which have a photochemical ozone creation potential.	
13. Disposal considerations		
Disposal instructions	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.	
Local disposal regulations	Dispose in accordance with all applicable regulations.	
Hazardous waste code	The waste code should be assigned in discussion between the user, the producer and the waste disposal company.	
Waste from residues / unused products	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).	

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.
